

PLA 350

ULTRA LITE
TOY HAULER

GO YOUR OWN WAY

Sizes **12', 14'** Base models **2**

Towable with
Compact Truck/ Mid-Size SUV

THE ULTRA LITE TOY HAULER

Go. Play. Stay. The ATC Plā 350 is a smaller excursion toy hauler that goes where others can't, allowing you to securely and safely bring your bikes, kayaks, dirt bikes, ATVs and small UTVs into remote areas. Its well-designed living space lets you rest comfortably during your adventure. Small and more lightweight than other toy haulers, the Plā 350 saves on fuel and can be towed with most compact trucks and mid-size SUVs. Configure sofa/bed, cabinets, tables and more to match your needs.

KEY FEATURES

Best Warranty

Backed by an industry-leading 5-year transferable warranty.

Clean and Green

Hypoallergenic and made with green and recycled materials.

Best-in-Class Carrying Capacity

Sturdy, lightweight frame offers up to 3,400 lbs. carrying capacity.

Easy to Clean

No wood used in construction; can be sprayed out with hose without fear of rust, rot, or mold or other water damage.

Excellent Resale Value

Highest resale value in its class.

CONFIGURABLE LIVING AREA

Plā 350's versatile airline tracks allow you to attach shelves, cabinets, tables and a sofa/bed in any configuration that works for you at that moment. In addition to furniture and other standard features, our ever-growing list of options allows you to add more at any time, including air conditioning or a toilet with privacy. Place cabinets where you want them, either horizontally or vertically.

ROOM FOR CARGO/SMALL TOYS

Fold up or remove furniture to maximize space for cargo or toys. Use tie downs to securely store cargo in the rear area. A 76" wide rear opening means there's space to load even a small two-seat, side-by-side.

TIE DOWNS

Nine floor airline tracks are fastened directly to the frame.

ALL-WEATHER PROTECTION PACKAGE

The PLā 350 has closed cell insulation in the walls and ceiling, plus structural foam in the sub floor. The enclosed underbelly with radiant barrier, and dual-pane frameless windows also allow for temp control and sound dampening, making the PLā 350 comfortable year round. Optional AC and heat are available.

ROOM FOR MORE

Locking side and front exterior storage doors open to compartments where you can store gear, leaving the interior of the trailer uncluttered.

EASY TO CLEAN

Toy haulers can get dirty inside once you haul your muddy toys inside. Because the PLā 350 has an all-aluminum frame with no wood in the construction, you can just hose out the interior without worrying about rust, rot or other water-related damage.

A STANDARD OF EXCELLENCE

All ATC products are built for a lifetime of use to the highest fit, finish and function standards in the industry. We start the construction of every trailer with a full-perimeter, six-sided, all tube aluminum frame. There are no fasteners to come loose over time. Our trailers are lighter but nearly twice as strong as RV industry standard steel frames.

As a result of our efforts, ATC is able to offer a 5-year transferable structural warranty, and our trailers have the highest resale value in their class.

1210 MODEL

Exterior Height (A/C Adds 11")	8' 8"
Exterior Length (Includes Hitch)	16' 2"
