

LIGHT SERIES RUBICON

** ALL CONSTRUCTION METHODS NOTED NOT USED ON RUBICON 1200RK

DISCLAIMER: Product information is as accurate as possible as of the date of this handout. All features, floor plans, and specifications in this handout are subject to change without notice. Please consult Dutchmen's website at www.Dutchmen.com for current product information and specifications.

"SIDEWALL" CONSTRUCTION

VACUUM BONDED SIDEWALLS

In the **VACUUM BONDING** process is done in a "Climate Controlled" Facility. The entire sidewall is placed in a giant temperature sensitive vacuum and **pressurized to approximately 129 pounds per square inch.**

The wall remains under pressure, for **20 to 40** minutes to allow the resins and adhesives to become one piece.

The walls are framed using Reinforced Welded Aluminum.

This process uses more advanced technology that is significantly more expensive than conventional pinch rolling, but the result is the **finest construction available in the RV industry today.** Only about 25% of OEM's use this.

- ✓ Fiberglass Gel Coat Exterior Panel
- ✓ Double Substrate Luan Wall Backing
- ✓ Aluminum Frame with Block Foam Insulation
- ✓ Luan Interior Wall Panel

"FLOOR" CONSTRUCTION

VACUUM BONDED FLOORS

COLEMAN® Light Builds use a "Vacuum Bonded Floor" as well!

LIGHT SERIES:

- Beauflor® Linoleum Flooring
- Double Luan Floor Decking
- Aluminum Frame w/Block Foam Insulation
- ✓ Luan Pane
- Darco Moisture Barrier
- Powder Coated Steel Main Frame
- Fully Enclosed and Insulated Underbelly

RUBICON USES: N/A 1200RK

- ✓ 3-layer construction of polypropylene and a weave of continuous & discontinuous fiber reinforced polymers, giving it **rigidity, impact strength, & long term durability**
- ✓ The bottom layer material uses a nonorganic poly fiber core combined with a durable exterior film that replaces Darco and **provides protection against road debris and the elements**
- ✓ the New floor **will not swell, mold, discolor or smell** after even prolonged exposure to water

"ROOF" CONSTRUCTION

FULL WALK-ON ROOF

N/A 1200RK

5" REINFORCED TRUSSED ROOF

- ✓ Steel Stamped 5" Trussed Roof
- ✓ Full Walk-On roof that uses 3/8" screwed down decking made of Marine Grade OSB.
- ✓ That is double trussed for A/C unit.

18 YEAR WARRANTY

THERMOPLASTIC POLYOLEFIN T.P.O. ROOF

- ✓ Seamless Single-Ply Roofing Membrane
- ✓ Wont Streak or Chalk

- ✓ Long Term Heat, UV & Natural Fungal Resistance.
- ✓ Its Maintenance Free and features an 18-Year Warranty

COLEMAN® LIGHTS: DO NOT come with Ladders. There is no backing.

COLEMAN® RUBICONS: DO come with Ladders. If there are no shortages.

"FRONT CAP" CONSTRUCTION

INSULATED & REINFORCED "FIBERGLASS" FRONT CAP

✓ Fiberglass Front Cap with
Automotive Windshield

✓ The Fiberglass backing is done by simultaneously mixing strand glass with catalyzed thermoset resin. The combined materials are manually sprayed to customer required thickness throughout the entire mold, then hand-rolled and formed with specialized tools.

✓ The random orientation of the fiber is easily formed and provides outstanding structural integrity.

LIGHT SERIES EXTERIOR ADVANTAGES

FIBERGLASS FRONT CAP W/ROCK GUARD

FULLY ENCLOSED, INSULATED & HEATED UNDERBELLY

BLACK TANK FLUSH

SLAM-LATCH BAGGAGE DOORS W/MAGNETIC CATCH

DEXTER® EZ LUBE AXLES

60 GALLON FRESH WATER CAPACITY

PREMIUM SOLID ENTRY STEPS

POWER STABILIZER JACKS

POWER TONGUE JACK

POWER AWNING W40LB AUTO DUMP

COMPLETE PASS THROUGH 52 Cu.Ft.

XL GRAB HANDLE AND FRICTION HINGED DOOR

8 ft. WIDE

INVERTER & SOLAR PREP STANDARD

EXTERIOR SHOWER HOT & COLD

FULL WALK-ON ROOF DOUBLE AXLE
