

NEW! From Jayco...

State-of-The Art Aluminum Construction PLUS Great Storage!

Since its introduction in early 1994, the Jayco Eagle SL has become one of America's hottest - selling lines of travel trailers. The State-of-The Art Aluminum frame construction makes the Eagle SL perfect for today's more fuel-efficient tow vehicles. And the innovative 25 cu.ft. front storage trunk means you'll have plenty of space for the things you need to take along on your weekend getaways or extended vacations.

Now Jayco is introducing two new models which will give you a choice of six floorplans - - all under 25 feet in length. The 220 SL features loads of living in a small trailer and the 234 SL boasts a rear bunkhouse sleeping arrangement. So if you're looking for the best in small travel trailer design, check out the new Jayco Eagle SLs.

- From our family to yours . . .
